## Business Opportunity

Pool Water Purification Products is a manufacturer of a complete mobile, high pressure, high volume, multiple membrane filtration system.

We use a reverse osmosis technology, housed in a self contained trailer.

- We use #316 stainless steel plumbing designed to withstand 300 psi pressures, up to 200 GPM flowrates
- We studied the environmental aspects that affect pool owners' pool longevity
- We also studied the actual pool water makeup
- Our process extends the life expectancy of pools and enhances the swimming environment to provide a healthier experience
- The system is AVAILABLE in three specific gallons per minute (GPM) sizes tailored for residential or commercially rated pools.
- Unit sizes are as follows:
  - #1) 15 HP - 60-80 GPM
  - #2) 25 HP - 100-140 GPM
  - #3) 40 HP - 185-225 GPM.

Clean, disinfected, softened water that feels wonderful!

Recycled, scientifically based, water conservation!

Cost effective for customers  
Financing available to get you in business!

You can build a residential and commercial business

## Water Process

- Processed water is cleaned, disinfected and softened to make the swimming experience more enjoyable
- This resulting recycled pool water eliminates acid washes, hours scrubbing tile and the need to drain pools
- Our system is a scientifically based water processing configuration that also conserves the water it is treating
- Our recycling process has been designed to remove excessive levels of:
  - ~ Calcium Hardness
  - ~ TDS
  - ~ CYA
  - ~ and other impurities that contribute to the hard scale on pool tile and interior surfaces, harms expensive pool equipment, the deck and tile grout
